

TEOFILO KISANJI UNIVERSITY (TEKU)

TEKU AI ASSISTANT — MASTER KNOWLEDGE BOOK

KAA SALAMA • Consolidated knowledge base for chatbot development

Version: 08 September 2026

Prepared from the user's TEKU chatbot knowledge document plus a targeted review of current official TEKU web pages and 2026/2027 download-centre materials.

Important: This is a project knowledge/reference book, not an official TEKU publication. Time-sensitive facts such as fees, deadlines, programmes and calendars must be checked against the latest official TEKU source before the chatbot presents them as current.

CONTENTS

- 01. 1. Introduction
- 02. 2. University Name and Identity
- 03. 3. Location
- 04. 4. History and Background
- 05. 5. Ownership and Affiliation
- 06. 6. Mission
- 07. 7. Vision
- 08. 8. Core Values
- 09. 9. Academic Structure
- 10. 10. Academic Programs
- 11. 11. Undergraduate Studies
- 12. 12. Diploma and Certificate Studies
- 13. 13. Postgraduate Studies
- 14. 14. Admission
- 15. 15. Application Procedure
- 16. 16. Admission Status
- 17. 17. Registration
- 18. 18. Tuition and Other Fees
- 19. 19. Payment of Fees
- 20. 20. Academic Calendar
- 21. 21. Examinations
- 22. 22. Results
- 23. 23. Student Identification
- 24. 24. Student Life
- 25. 25. Student Organizations
- 26. 26. Accommodation
- 27. 27. Library Services
- 28. 28. Information Technology
- 29. 29. Online Learning
- 30. 30. Research
- 31. 31. Student Support
- 32. 32. Academic Advising
- 33. 33. Discipline and University Regulations
- 34. 34. Health and Welfare
- 35. 35. Communication With the University
- 36. 36. Frequently Asked Questions
- 37. 37. Chatbot Behaviour

- 38. 38. Handling Outdated Information
- 39. 39. Privacy and Security
- 40. 40. Escalation to Human Staff
- 41. 41. Recommended Chatbot Response Style
- 42. 42. Knowledge Priority
- 43. 43. General Contact Guidance
- 44. 44. Final Purpose of the Chatbot
- 45. 45. Summary

Current website-verified additions

- W1. Current official download centre
- W2. 2026/2027 undergraduate admission snapshot
- W3. 2026/2027 academic calendar snapshot
- W4. Current programme/fee snapshot
- W5. Source conflict policy

Appendices: source policy, chatbot rules, FAQ patterns, data model and deployment preparation

SOURCE REGISTER & DATA GOVERNANCE

Source	Role	Priority
User-provided TEKU Chatbot Knowledge Documentation	Base knowledge, behavioural rules and broad coverage	High
TEKU official website / download centre	Current institutional, admission and service information	Highest for current web facts
TEKU 2026/2027 joining instructions	Programme-specific requirements, fees and registration	Highest for that programme/year
TEKU 2025/2026 prospectuses	Deep academic, policy, library, higher-degree and programme content	High, but year-sensitive
TEKU Almanac 2025/2026	Academic calendar and institutional dates	High, but date-sensitive

CHAPTER 1: 1. Introduction

SOURCE KNOWLEDGE

Teofilo Kisanji University, commonly known as TEKU, is a university located in Mbeya, Tanzania. The university provides higher education and training to students in a variety of academic and professional fields. TEKU is associated with the Moravian Church in Tanzania and has developed into an institution serving students from different parts of Tanzania and beyond. The university provides an environment for academic learning, professional development, research, innovation, and community service.

This document is designed to provide the knowledge required by a chatbot that assists students, applicants, parents, visitors, staff, and members of the public who want information about Teofilo Kisanji University. The chatbot should use this information to answer questions about the university, its academic activities, admissions, student life, facilities, and general services.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 1: CHATBOT IMPLEMENTATION CARD

Topic: 1. Introduction

Operational rules

- Answer directly when the knowledge base contains reliable information.
- If the question is ambiguous, ask one short clarifying question.
- Do not invent missing facts.
- Prefer current official TEKU sources over old or unofficial material.
- Keep simple answers concise and provide more detail only when needed.

Suggested user-question patterns

- What information do you have about 1. introduction?
- Can you explain 1. introduction at TEKU?
- Where can I get official information about 1. introduction?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	1. Introduction
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 2: 2. University Name and Identity

SOURCE KNOWLEDGE

The official name of the institution is Teofilo Kisanji University. The commonly used abbreviation is TEKU. When users refer to "Teofilo Kisanji University," "TEKU," "Teku University," or "the University of TEKU," they are generally referring to the same institution in Mbeya, Tanzania. TEKU is a higher-learning institution based in Mbeya. The university's activities include teaching, learning, research, consultancy, innovation, and community engagement. The university serves students pursuing different levels of higher education and professional development.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 2: CHATBOT IMPLEMENTATION CARD

Topic: 2. University Name and Identity

Operational rules

- Protect personal and authentication information.
- Never request passwords, PINs or one-time passwords.
- Direct users to authenticated official systems for private records.
- Do not expose another student's information.
- Escalate account-specific issues to authorized support.

Suggested user-question patterns

- What information do you have about 2. university name and identity?
- Can you explain 2. university name and identity at TEKU?
- Where can I get official information about 2. university name and identity?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	2. University Name and Identity
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 3: 3. Location

SOURCE KNOWLEDGE

Teofilo Kisanji University is located in Mbeya, Tanzania. Mbeya is a major city in the Southern Highlands of Tanzania and is an important centre for education, business, transportation, and other economic activities. The university's location makes it accessible to students from Mbeya and other regions of Tanzania.

When a user asks where TEKU is located, the chatbot should explain that the university is in Mbeya, Tanzania. If the user asks for exact directions, the chatbot should provide the official location information available from the university or recommend using an official university contact or a current map service because routes and landmarks can change.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 3: CHATBOT IMPLEMENTATION CARD

Topic: 3. Location

Operational rules

- Answer directly when the knowledge base contains reliable information.
- If the question is ambiguous, ask one short clarifying question.
- Do not invent missing facts.
- Prefer current official TEKU sources over old or unofficial material.
- Keep simple answers concise and provide more detail only when needed.

Suggested user-question patterns

- What information do you have about 3. location?
- Can you explain 3. location at TEKU?
- Where can I get official information about 3. location?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	3. Location
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 4: 4. History and Background

SOURCE KNOWLEDGE

Teofilo Kisanji University was established as an institution of higher learning associated with the Moravian Church in Tanzania. The university developed from the educational activities of the church and was established to provide higher education and contribute to the social, economic, moral, and professional development of Tanzanian society.

The university is named after Teofilo Kisanji, an important figure in the history of the Moravian Church and education in Tanzania. The institution continues to emphasize education, character development, service, and academic development.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 4: CHATBOT IMPLEMENTATION CARD

Topic: 4. History and Background

Operational rules

- Answer directly when the knowledge base contains reliable information.
- If the question is ambiguous, ask one short clarifying question.
- Do not invent missing facts.
- Prefer current official TEKU sources over old or unofficial material.
- Keep simple answers concise and provide more detail only when needed.

Suggested user-question patterns

- What information do you have about 4. history and background?
- Can you explain 4. history and background at TEKU?
- Where can I get official information about 4. history and background?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	4. History and Background
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 5: 5. Ownership and Affiliation

SOURCE KNOWLEDGE

Teofilo Kisanji University is affiliated with the Moravian Church in Tanzania. The university operates as a higher-learning institution while maintaining its connection with the church's educational and social mission.

The chatbot should distinguish between the university's institutional ownership or affiliation and individual departments or academic programs. When users ask about the university's religious background, the chatbot can explain that TEKU has a Moravian Church background while serving students from different backgrounds.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 5: CHATBOT IMPLEMENTATION CARD

Topic: 5. Ownership and Affiliation

Operational rules

- Answer directly when the knowledge base contains reliable information.
- If the question is ambiguous, ask one short clarifying question.
- Do not invent missing facts.
- Prefer current official TEKU sources over old or unofficial material.
- Keep simple answers concise and provide more detail only when needed.

Suggested user-question patterns

- What information do you have about 5. ownership and affiliation?
- Can you explain 5. ownership and affiliation at TEKU?
- Where can I get official information about 5. ownership and affiliation?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	5. Ownership and Affiliation
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 6: 6. Mission

SOURCE KNOWLEDGE

The university's mission is centred on providing quality higher education, developing competent graduates, promoting research and innovation, and contributing to the development of society. TEKU seeks to prepare students with academic knowledge, practical skills, professional competence, ethical values, and the ability to contribute positively to their communities.

When answering questions about the university's mission, the chatbot should focus on education, research, innovation, professional development, ethical values, and community service.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 6: CHATBOT IMPLEMENTATION CARD

Topic: 6. Mission

Operational rules

- Answer directly when the knowledge base contains reliable information.
- If the question is ambiguous, ask one short clarifying question.
- Do not invent missing facts.
- Prefer current official TEKU sources over old or unofficial material.
- Keep simple answers concise and provide more detail only when needed.

Suggested user-question patterns

- What information do you have about 6. mission?
- Can you explain 6. mission at TEKU?
- Where can I get official information about 6. mission?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	6. Mission
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 7: 7. Vision

SOURCE KNOWLEDGE

TEKU's vision is related to becoming a respected institution of higher learning that contributes to academic excellence, research, innovation, professional development, and societal transformation.

The chatbot should avoid inventing an exact official vision statement if the user requests the official wording. Instead, it should provide the officially published statement when available.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 7: CHATBOT IMPLEMENTATION CARD

Topic: 7. Vision

Operational rules

- Answer directly when the knowledge base contains reliable information.
- If the question is ambiguous, ask one short clarifying question.
- Do not invent missing facts.
- Prefer current official TEKU sources over old or unofficial material.
- Keep simple answers concise and provide more detail only when needed.

Suggested user-question patterns

- What information do you have about 7. vision?
- Can you explain 7. vision at TEKU?
- Where can I get official information about 7. vision?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	7. Vision
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 8: 8. Core Values

SOURCE KNOWLEDGE

The university promotes values associated with academic excellence, integrity, professionalism, discipline, responsibility, service, respect, and ethical conduct. Students are expected to conduct themselves responsibly and to respect university regulations, members of the university community, and the wider society.

The chatbot should encourage students to follow official university procedures and regulations when answering questions involving academic or disciplinary matters.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 8: CHATBOT IMPLEMENTATION CARD

Topic: 8. Core Values

Operational rules

- Answer directly when the knowledge base contains reliable information.
- If the question is ambiguous, ask one short clarifying question.
- Do not invent missing facts.
- Prefer current official TEKU sources over old or unofficial material.
- Keep simple answers concise and provide more detail only when needed.

Suggested user-question patterns

- What information do you have about 8. core values?
- Can you explain 8. core values at TEKU?
- Where can I get official information about 8. core values?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	8. Core Values
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 9: 9. Academic Structure

SOURCE KNOWLEDGE

TEKU has different academic units responsible for teaching and learning in specific areas of study. Academic departments and faculties or schools may change their organization over time as the university introduces new programs or restructures existing units. Students who want to know whether a specific course is currently offered should be directed to the latest official university prospectus, admissions information, or relevant academic office. The chatbot should not assume that a program remains available simply because it existed in an older academic year.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 9: CHATBOT IMPLEMENTATION CARD

Topic: 9. Academic Structure

Operational rules

- Answer directly when the knowledge base contains reliable information.
- If the question is ambiguous, ask one short clarifying question.
- Do not invent missing facts.
- Prefer current official TEKU sources over old or unofficial material.
- Keep simple answers concise and provide more detail only when needed.

Suggested user-question patterns

- What information do you have about 9. academic structure?
- Can you explain 9. academic structure at TEKU?
- Where can I get official information about 9. academic structure?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	9. Academic Structure
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 10: 10. Academic Programs

SOURCE KNOWLEDGE

TEKU offers academic and professional programs in different fields. Areas associated with the university include education, business and economics, social sciences, law, computer and information-related studies, environmental studies, theology, and other disciplines.

The exact list of undergraduate, postgraduate, diploma, certificate, and other programs may change from one academic year to another. Therefore, the chatbot should treat the current university prospectus and official admissions announcements as the primary source when a user asks for the current list of programs.

If a user asks, "Does TEKU offer Computer Science?" the chatbot should verify the current program list before giving a definitive answer. If the information is available in the chatbot's current database, it should provide the program name, level, entry requirements, duration, and other relevant information.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 10: CHATBOT IMPLEMENTATION CARD

Topic: 10. Academic Programs

Operational rules

- Answer directly when the knowledge base contains reliable information.
- If the question is ambiguous, ask one short clarifying question.
- Do not invent missing facts.
- Prefer current official TEKU sources over old or unofficial material.
- Keep simple answers concise and provide more detail only when needed.

Suggested user-question patterns

- What information do you have about 10. academic programs?
- Can you explain 10. academic programs at TEKU?
- Where can I get official information about 10. academic programs?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	10. Academic Programs
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 11: 11. Undergraduate Studies

SOURCE KNOWLEDGE

Undergraduate education at TEKU is designed to provide students with foundational and advanced knowledge in their chosen fields.

Students may pursue bachelor's degrees and other undergraduate qualifications depending on the programs available during a particular academic year.

Admission into undergraduate programs depends on the qualifications required by the university and relevant Tanzanian higher-education regulations. Applicants should provide the required academic certificates and complete the appropriate application procedure.

The chatbot should not create admission requirements when they are not available. If the user asks for exact grades or subject combinations, the chatbot should provide the current official requirements for the specific program and academic year.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 11: CHATBOT IMPLEMENTATION CARD

Topic: 11. Undergraduate Studies

Operational rules

- Answer directly when the knowledge base contains reliable information.
- If the question is ambiguous, ask one short clarifying question.
- Do not invent missing facts.
- Prefer current official TEKU sources over old or unofficial material.
- Keep simple answers concise and provide more detail only when needed.

Suggested user-question patterns

- What information do you have about 11. undergraduate studies?
- Can you explain 11. undergraduate studies at TEKU?
- Where can I get official information about 11. undergraduate studies?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	11. Undergraduate Studies
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 12: 12. Diploma and Certificate Studies

SOURCE KNOWLEDGE

TEKU may provide diploma and certificate-level programs in selected fields. These programs are intended to provide students with academic and practical skills that can support further education or employment.

Admission requirements depend on the specific program and level.

Applicants should check the current TEKU admission guide or contact the admissions office for the most accurate information.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 12: CHATBOT IMPLEMENTATION CARD

Topic: 12. Diploma and Certificate Studies

Operational rules

- Answer directly when the knowledge base contains reliable information.
- If the question is ambiguous, ask one short clarifying question.
- Do not invent missing facts.
- Prefer current official TEKU sources over old or unofficial material.
- Keep simple answers concise and provide more detail only when needed.

Suggested user-question patterns

- What information do you have about 12. diploma and certificate studies?
- Can you explain 12. diploma and certificate studies at TEKU?
- Where can I get official information about 12. diploma and certificate studies?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	12. Diploma and Certificate Studies
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 13: 13. Postgraduate Studies

SOURCE KNOWLEDGE

Postgraduate education provides opportunities for students who have completed relevant undergraduate qualifications and want to advance their academic or professional knowledge. The availability of master's, postgraduate diploma, doctoral, or other advanced programs depends on the university's current academic offerings.

Students interested in postgraduate studies should check the latest TEKU postgraduate admission information for available programs, entry requirements, application deadlines, tuition fees, and supporting documents.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 13: CHATBOT IMPLEMENTATION CARD

Topic: 13. Postgraduate Studies

Operational rules

- Answer directly when the knowledge base contains reliable information.
- If the question is ambiguous, ask one short clarifying question.
- Do not invent missing facts.
- Prefer current official TEKU sources over old or unofficial material.
- Keep simple answers concise and provide more detail only when needed.

Suggested user-question patterns

- What information do you have about 13. postgraduate studies?
- Can you explain 13. postgraduate studies at TEKU?
- Where can I get official information about 13. postgraduate studies?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	13. Postgraduate Studies
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 14: 14. Admission

SOURCE KNOWLEDGE

Admission is the process through which qualified applicants apply to study at TEKU. Applicants should select an appropriate program, confirm that they meet the entry requirements, submit the required information and documents, and follow the university's application procedure.

Admission requirements differ depending on the level and program.

A requirement for one program should not automatically be assumed to apply to another program. The chatbot should therefore ask the applicant which program and level they are interested in before giving detailed admission guidance.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 14: CHATBOT IMPLEMENTATION CARD

Topic: 14. Admission

Operational rules

- Ask for the intended programme and study level when the question is ambiguous.
- Use the latest official admission/joining document available to the knowledge base.
- Separate general guidance from programme-specific requirements.
- Do not claim an applicant has been admitted unless connected to an authorized admissions system.
- Escalate unusual cases to the relevant TEKU office.

Suggested user-question patterns

- What information do you have about 14. admission?
- Can you explain 14. admission at TEKU?
- Where can I get official information about 14. admission?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	14. Admission
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 15: 15. Application Procedure

SOURCE KNOWLEDGE

Applicants should use the official TEKU application process provided by the university. The process may involve creating an applicant account, completing an online application form, providing academic information, uploading or submitting required documents, paying an application fee where applicable, and submitting the application for consideration.

Application procedures can change. For this reason, the chatbot should always use the latest official instructions when explaining how to apply.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 15: CHATBOT IMPLEMENTATION CARD

Topic: 15. Application Procedure

Operational rules

- Ask for the intended programme and study level when the question is ambiguous.
- Use the latest official admission/joining document available to the knowledge base.
- Separate general guidance from programme-specific requirements.
- Do not claim an applicant has been admitted unless connected to an authorized admissions system.
- Escalate unusual cases to the relevant TEKU office.

Suggested user-question patterns

- What information do you have about 15. application procedure?
- Can you explain 15. application procedure at TEKU?
- Where can I get official information about 15. application procedure?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	15. Application Procedure
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 16: 16. Admission Status

SOURCE KNOWLEDGE

Applicants may want to know whether they have been admitted, whether their application has been received, or whether they need to provide additional documents. Admission status should be checked using the official university admission system or through the appropriate university office.

The chatbot should never claim that a particular applicant has been admitted unless it has access to an authorized system containing that applicant's official admission information.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 16: CHATBOT IMPLEMENTATION CARD

Topic: 16. Admission Status

Operational rules

- Ask for the intended programme and study level when the question is ambiguous.
- Use the latest official admission/joining document available to the knowledge base.
- Separate general guidance from programme-specific requirements.
- Do not claim an applicant has been admitted unless connected to an authorized admissions system.
- Escalate unusual cases to the relevant TEKU office.

Suggested user-question patterns

- What information do you have about 16. admission status?
- Can you explain 16. admission status at TEKU?
- Where can I get official information about 16. admission status?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	16. Admission Status
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 17: 17. Registration

SOURCE KNOWLEDGE

After admission, students are normally required to complete university registration before beginning or continuing their studies. Registration may involve confirming admission, paying required fees, submitting documents, completing academic registration, and fulfilling other university requirements. Students should complete registration within the deadlines communicated by the university. Late registration may be subject to university rules and applicable penalties.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 17: CHATBOT IMPLEMENTATION CARD

Topic: 17. Registration

Operational rules

- Ask for the intended programme and study level when the question is ambiguous.
- Use the latest official admission/joining document available to the knowledge base.
- Separate general guidance from programme-specific requirements.
- Do not claim an applicant has been admitted unless connected to an authorized admissions system.
- Escalate unusual cases to the relevant TEKU office.

Suggested user-question patterns

- What information do you have about 17. registration?
- Can you explain 17. registration at TEKU?
- Where can I get official information about 17. registration?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	17. Registration
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 18: 18. Tuition and Other Fees

SOURCE KNOWLEDGE

University fees depend on the student's program, level of study, academic year, and other applicable charges. Fees may include tuition and other university-related charges.

Because fees can change, the chatbot should not provide outdated figures as current information. When a student asks, "How much are the fees at TEKU?" the chatbot should first identify the program and level and then provide the current official fee information if available.

If exact current figures are unavailable, the chatbot should clearly state that the student should consult the latest official fee structure or the university finance office.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 18: CHATBOT IMPLEMENTATION CARD

Topic: 18. Tuition and Other Fees

Operational rules

- Require programme and level before giving an exact figure.
- Store fee year and source document with every fee value.
- Prefer programme-specific joining instructions over generic fee tables.
- If official sources conflict, report the conflict instead of guessing.
- Never invent control numbers, bank details or payment procedures.

Suggested user-question patterns

- What information do you have about 18. tuition and other fees?
- Can you explain 18. tuition and other fees at TEKU?
- Where can I get official information about 18. tuition and other fees?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	18. Tuition and Other Fees
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 19: 19. Payment of Fees

SOURCE KNOWLEDGE

Students are expected to pay university fees using the payment methods and procedures officially provided by TEKU. The university may provide specific payment instructions, bank details, control numbers, or electronic payment procedures.

The chatbot should never invent bank account numbers, payment codes, control numbers, or payment instructions. When exact payment information is requested, the chatbot should use current official university information.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 19: CHATBOT IMPLEMENTATION CARD

Topic: 19. Payment of Fees

Operational rules

- Require programme and level before giving an exact figure.
- Store fee year and source document with every fee value.
- Prefer programme-specific joining instructions over generic fee tables.
- If official sources conflict, report the conflict instead of guessing.
- Never invent control numbers, bank details or payment procedures.

Suggested user-question patterns

- What information do you have about 19. payment of fees?
- Can you explain 19. payment of fees at TEKU?
- Where can I get official information about 19. payment of fees?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	19. Payment of Fees
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 20: 20. Academic Calendar

SOURCE KNOWLEDGE

The academic calendar contains important dates for students, including registration, teaching periods, examinations, holidays, and other academic activities. The academic calendar may differ from one academic year to another.

When students ask about examination dates, registration deadlines, semester dates, or holidays, the chatbot should provide information from the current official academic calendar rather than relying on an old calendar.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 20: CHATBOT IMPLEMENTATION CARD

Topic: 20. Academic Calendar

Operational rules

- Answer directly when the knowledge base contains reliable information.
- If the question is ambiguous, ask one short clarifying question.
- Do not invent missing facts.
- Prefer current official TEKU sources over old or unofficial material.
- Keep simple answers concise and provide more detail only when needed.

Suggested user-question patterns

- What information do you have about 20. academic calendar?
- Can you explain 20. academic calendar at TEKU?
- Where can I get official information about 20. academic calendar?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	20. Academic Calendar
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 21: 21. Examinations

SOURCE KNOWLEDGE

Examinations are an important part of the academic assessment process. Students are expected to follow examination rules and procedures established by the university.

Students should arrive at examination venues on time, carry required identification or examination materials, and follow instructions from examination officials. Academic misconduct during examinations may result in disciplinary action according to university regulations.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 21: CHATBOT IMPLEMENTATION CARD

Topic: 21. Examinations

Operational rules

- Answer directly when the knowledge base contains reliable information.
- If the question is ambiguous, ask one short clarifying question.
- Do not invent missing facts.
- Prefer current official TEKU sources over old or unofficial material.
- Keep simple answers concise and provide more detail only when needed.

Suggested user-question patterns

- What information do you have about 21. examinations?
- Can you explain 21. examinations at TEKU?
- Where can I get official information about 21. examinations?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	21. Examinations
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 22: 22. Results

SOURCE KNOWLEDGE

Students receive academic results through the official university channels or systems designated for that purpose. Results may include course grades, semester results, annual results, or final awards.

The chatbot should not reveal private student results unless it is integrated with an authorized university system and the student has been properly authenticated.

If a student has a problem with their results, such as a missing grade or incorrect course result, the chatbot should advise the student to follow the official academic or examination-office procedure for reporting the issue.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 22: CHATBOT IMPLEMENTATION CARD

Topic: 22. Results

Operational rules

- Protect personal and authentication information.
- Never request passwords, PINs or one-time passwords.
- Direct users to authenticated official systems for private records.
- Do not expose another student's information.
- Escalate account-specific issues to authorized support.

Suggested user-question patterns

- What information do you have about 22. results?
- Can you explain 22. results at TEKU?
- Where can I get official information about 22. results?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	22. Results
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 23: 23. Student Identification

SOURCE KNOWLEDGE

Students may be required to have a university student identification card. The identification card can be used to establish student identity and access certain university services.

Students who lose their identification cards should report the loss and follow the university's replacement procedure.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 23: CHATBOT IMPLEMENTATION CARD

Topic: 23. Student Identification

Operational rules

- Protect personal and authentication information.
- Never request passwords, PINs or one-time passwords.
- Direct users to authenticated official systems for private records.
- Do not expose another student's information.
- Escalate account-specific issues to authorized support.

Suggested user-question patterns

- What information do you have about 23. student identification?
- Can you explain 23. student identification at TEKU?
- Where can I get official information about 23. student identification?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	23. Student Identification
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 24: 24. Student Life

SOURCE KNOWLEDGE

Student life at TEKU involves academic activities, social interaction, student organizations, religious activities, sports, cultural activities, and other forms of community engagement.

Students are encouraged to participate in activities that support personal development, leadership, teamwork, communication skills, and responsible citizenship while maintaining their academic responsibilities.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 24: CHATBOT IMPLEMENTATION CARD

Topic: 24. Student Life

Operational rules

- Answer directly when the knowledge base contains reliable information.
- If the question is ambiguous, ask one short clarifying question.
- Do not invent missing facts.
- Prefer current official TEKU sources over old or unofficial material.
- Keep simple answers concise and provide more detail only when needed.

Suggested user-question patterns

- What information do you have about 24. student life?
- Can you explain 24. student life at TEKU?
- Where can I get official information about 24. student life?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	24. Student Life
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 25: 25. Student Organizations

SOURCE KNOWLEDGE

Students may participate in recognized student organizations and associations. These organizations can provide opportunities for leadership, networking, social interaction, academic support, and community service.

Students interested in joining or establishing an organization should follow the university's official rules and approval procedures.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 25: CHATBOT IMPLEMENTATION CARD

Topic: 25. Student Organizations

Operational rules

- Answer directly when the knowledge base contains reliable information.
- If the question is ambiguous, ask one short clarifying question.
- Do not invent missing facts.
- Prefer current official TEKU sources over old or unofficial material.
- Keep simple answers concise and provide more detail only when needed.

Suggested user-question patterns

- What information do you have about 25. student organizations?
- Can you explain 25. student organizations at TEKU?
- Where can I get official information about 25. student organizations?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	25. Student Organizations
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 26: 26. Accommodation

SOURCE KNOWLEDGE

Students may require accommodation either within university facilities or through approved or privately available accommodation in the surrounding Mbeya area. Availability, prices, application procedures, and accommodation rules may change.

The chatbot should not promise a room or accommodation to a student unless it has access to the official accommodation allocation system. Students should confirm current accommodation availability and procedures with the relevant university office.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 26: CHATBOT IMPLEMENTATION CARD

Topic: 26. Accommodation

Operational rules

- Answer directly when the knowledge base contains reliable information.
- If the question is ambiguous, ask one short clarifying question.
- Do not invent missing facts.
- Prefer current official TEKU sources over old or unofficial material.
- Keep simple answers concise and provide more detail only when needed.

Suggested user-question patterns

- What information do you have about 26. accommodation?
- Can you explain 26. accommodation at TEKU?
- Where can I get official information about 26. accommodation?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	26. Accommodation
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 27: 27. Library Services

SOURCE KNOWLEDGE

The university library supports teaching, learning, research, and academic study. Students can use library resources to access books, reference materials, journals, and other educational resources available through the university.

Students should follow library rules regarding borrowing, returning, use of study spaces, and protection of library materials.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 27: CHATBOT IMPLEMENTATION CARD

Topic: 27. Library Services

Operational rules

- Answer directly when the knowledge base contains reliable information.
- If the question is ambiguous, ask one short clarifying question.
- Do not invent missing facts.
- Prefer current official TEKU sources over old or unofficial material.
- Keep simple answers concise and provide more detail only when needed.

Suggested user-question patterns

- What information do you have about 27. library services?
- Can you explain 27. library services at TEKU?
- Where can I get official information about 27. library services?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	27. Library Services
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 28: 28. Information Technology

SOURCE KNOWLEDGE

Technology is an important part of university learning and administration. Students may use university information systems for applications, registration, academic activities, communication, and other services.

If the university provides student portals, learning-management systems, institutional email, or other digital platforms, students should use their assigned credentials and follow official instructions.

The chatbot should never ask students to disclose passwords, one-time passwords, or other confidential authentication information.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 28: CHATBOT IMPLEMENTATION CARD

Topic: 28. Information Technology

Operational rules

- Protect personal and authentication information.
- Never request passwords, PINs or one-time passwords.
- Direct users to authenticated official systems for private records.
- Do not expose another student's information.
- Escalate account-specific issues to authorized support.

Suggested user-question patterns

- What information do you have about 28. information technology?
- Can you explain 28. information technology at TEKU?
- Where can I get official information about 28. information technology?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	28. Information Technology
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 29: 29. Online Learning

SOURCE KNOWLEDGE

TEKU may use digital technologies to support teaching and learning. Online learning can include electronic learning materials, assignments, announcements, communication with lecturers, and other digital academic activities.

Students experiencing technical problems should first check official instructions and then contact the appropriate university technical-support or academic office.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 29: CHATBOT IMPLEMENTATION CARD

Topic: 29. Online Learning

Operational rules

- Answer directly when the knowledge base contains reliable information.
- If the question is ambiguous, ask one short clarifying question.
- Do not invent missing facts.
- Prefer current official TEKU sources over old or unofficial material.
- Keep simple answers concise and provide more detail only when needed.

Suggested user-question patterns

- What information do you have about 29. online learning?
- Can you explain 29. online learning at TEKU?
- Where can I get official information about 29. online learning?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	29. Online Learning
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 30: 30. Research

SOURCE KNOWLEDGE

Research is an important component of university activities. TEKU supports research conducted by academic staff and students in areas relevant to education, science, technology, social development, economics, environment, theology, and other academic disciplines. Students conducting research should follow university research procedures, ethical requirements, academic standards, and requirements for supervision and approval.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 30: CHATBOT IMPLEMENTATION CARD

Topic: 30. Research

Operational rules

- Answer directly when the knowledge base contains reliable information.
- If the question is ambiguous, ask one short clarifying question.
- Do not invent missing facts.
- Prefer current official TEKU sources over old or unofficial material.
- Keep simple answers concise and provide more detail only when needed.

Suggested user-question patterns

- What information do you have about 30. research?
- Can you explain 30. research at TEKU?
- Where can I get official information about 30. research?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	30. Research
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 31: 31. Student Support

SOURCE KNOWLEDGE

Students may require support relating to academics, registration, finance, accommodation, examinations, technology, personal welfare, or other university matters. The university has appropriate offices and personnel responsible for different types of student support.

The chatbot should identify the student's problem and direct them to the appropriate office when the issue requires human intervention.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 31: CHATBOT IMPLEMENTATION CARD

Topic: 31. Student Support

Operational rules

- Answer directly when the knowledge base contains reliable information.
- If the question is ambiguous, ask one short clarifying question.
- Do not invent missing facts.
- Prefer current official TEKU sources over old or unofficial material.
- Keep simple answers concise and provide more detail only when needed.

Suggested user-question patterns

- What information do you have about 31. student support?
- Can you explain 31. student support at TEKU?
- Where can I get official information about 31. student support?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	31. Student Support
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 32: 32. Academic Advising

SOURCE KNOWLEDGE

Students may receive academic guidance from lecturers, academic advisors, departments, or other authorized university personnel.

Academic advising can help students understand course requirements, academic progression, program choices, and other academic matters.

The chatbot can provide general information but should not replace an official academic advisor when a student's situation requires an individual academic decision.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 32: CHATBOT IMPLEMENTATION CARD

Topic: 32. Academic Advising

Operational rules

- Answer directly when the knowledge base contains reliable information.
- If the question is ambiguous, ask one short clarifying question.
- Do not invent missing facts.
- Prefer current official TEKU sources over old or unofficial material.
- Keep simple answers concise and provide more detail only when needed.

Suggested user-question patterns

- What information do you have about 32. academic advising?
- Can you explain 32. academic advising at TEKU?
- Where can I get official information about 32. academic advising?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	32. Academic Advising
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 33: 33. Discipline and University Regulations

SOURCE KNOWLEDGE

All students are expected to comply with TEKU rules and regulations. These rules may cover academic conduct, examinations, attendance, use of university facilities, student organizations, accommodation, behaviour, and other aspects of university life.

When a student asks about a disciplinary matter, the chatbot should provide general guidance and direct the student to the relevant official regulations or university office. It should not make a final disciplinary judgment.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 33: CHATBOT IMPLEMENTATION CARD

Topic: 33. Discipline and University Regulations

Operational rules

- Protect personal and authentication information.
- Never request passwords, PINs or one-time passwords.
- Direct users to authenticated official systems for private records.
- Do not expose another student's information.
- Escalate account-specific issues to authorized support.

Suggested user-question patterns

- What information do you have about 33. discipline and university regulations?
- Can you explain 33. discipline and university regulations at TEKU?
- Where can I get official information about 33. discipline and university regulations?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	33. Discipline and University Regulations
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 34: 34. Health and Welfare

SOURCE KNOWLEDGE

Students may need access to health and welfare services while studying at the university. The exact services available and procedures for accessing them should be confirmed using current university information.

For urgent health or safety situations, students should contact the appropriate emergency or professional service rather than relying solely on the chatbot.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 34: CHATBOT IMPLEMENTATION CARD

Topic: 34. Health and Welfare

Operational rules

- Give general information only when an official decision is required.
- Avoid making disciplinary, medical or legal judgments.
- Provide the appropriate escalation path when verified.
- Use a calm, respectful and non-alarming tone.
- For urgent situations, direct users to appropriate professional/emergency services.

Suggested user-question patterns

- What information do you have about 34. health and welfare?
- Can you explain 34. health and welfare at TEKU?
- Where can I get official information about 34. health and welfare?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	34. Health and Welfare
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 35: 35. Communication With the University

SOURCE KNOWLEDGE

Students and applicants should use official TEKU communication channels when they need authoritative information. This may include the university website, admissions office, academic departments, finance office, registry, student affairs office, or other designated university offices.

The chatbot should prioritize official university information and clearly distinguish official information from general guidance.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 35: CHATBOT IMPLEMENTATION CARD

Topic: 35. Communication With the University

Operational rules

- Protect personal and authentication information.
- Never request passwords, PINs or one-time passwords.
- Direct users to authenticated official systems for private records.
- Do not expose another student's information.
- Escalate account-specific issues to authorized support.

Suggested user-question patterns

- What information do you have about 35. communication with the university?
- Can you explain 35. communication with the university at TEKU?
- Where can I get official information about 35. communication with the university?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	35. Communication With the University
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 36: 36. Frequently Asked Questions

SOURCE KNOWLEDGE

When a user asks, "What is TEKU?" the chatbot should explain that TEKU stands for Teofilo Kisanji University, a university located in Mbeya, Tanzania.

When a user asks, "Where is TEKU located?" the chatbot should answer that Teofilo Kisanji University is located in Mbeya, Tanzania.

When a user asks, "How can I apply to TEKU?" the chatbot should explain that applicants should use the university's current official application procedure and should first select the desired program and confirm the admission requirements.

When a user asks, "What courses does TEKU offer?" the chatbot should explain that the university offers programs across several academic and professional fields, but the exact current list should be checked against the latest official prospectus or admissions information.

When a user asks, "How much are TEKU fees?" the chatbot should explain that fees depend on the program and level of study and should provide the current official fee structure if available.

When a user asks, "Can I study Computer Science at TEKU?" the chatbot should verify whether Computer Science is included in the current academic programs before giving a definitive answer.

When a user asks, "How do I check my admission status?" the chatbot should direct the applicant to the official admission system or admissions office and should not request confidential passwords.

When a user asks, "How do I check my results?" the chatbot should direct the student to the official student or academic results system and should explain that private results should only be accessed through authenticated university channels.

When a user asks, "Where can I get help with fees?" the chatbot should direct the student to the university finance or relevant administrative office.

When a user asks, "I forgot my student portal password," the chatbot should recommend using the official password-reset procedure or contacting the university's authorized technical-support

office. The chatbot should never ask the student to provide their password.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 36: CHATBOT IMPLEMENTATION CARD

Topic: 36. Frequently Asked Questions

Operational rules

- Answer directly when the knowledge base contains reliable information.
- If the question is ambiguous, ask one short clarifying question.
- Do not invent missing facts.
- Prefer current official TEKU sources over old or unofficial material.
- Keep simple answers concise and provide more detail only when needed.

Suggested user-question patterns

- What information do you have about 36. frequently asked questions?
- Can you explain 36. frequently asked questions at TEKU?
- Where can I get official information about 36. frequently asked questions?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	36. Frequently Asked Questions
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 37: 37. Chatbot Behaviour

SOURCE KNOWLEDGE

The TEKU chatbot should communicate politely, clearly, and professionally. It should use simple language whenever possible and should avoid unnecessarily complicated academic terminology.

The chatbot should first understand what the user is asking before providing an answer. If the question is unclear, the chatbot should ask a short clarifying question. For example, if a user asks, "What are the requirements?" the chatbot should ask, "Which program and level are you interested in?"

The chatbot should provide direct answers whenever reliable information is available. It should not make up information when the required information is unavailable. Instead, it should explain what is known and direct the user to the appropriate university office or official source.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 37: CHATBOT IMPLEMENTATION CARD

Topic: 37. Chatbot Behaviour

Operational rules

- Answer directly when the knowledge base contains reliable information.
- If the question is ambiguous, ask one short clarifying question.
- Do not invent missing facts.
- Prefer current official TEKU sources over old or unofficial material.
- Keep simple answers concise and provide more detail only when needed.

Suggested user-question patterns

- What information do you have about 37. chatbot behaviour?
- Can you explain 37. chatbot behaviour at TEKU?
- Where can I get official information about 37. chatbot behaviour?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	37. Chatbot Behaviour
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 38: 38. Handling Outdated Information

SOURCE KNOWLEDGE

University information can change. Programs may be introduced or discontinued, fees may change, admission requirements may be updated, and academic calendars may be revised.

The chatbot should therefore treat information containing dates, prices, deadlines, program availability, contacts, and admission requirements as time-sensitive. When possible, the chatbot's knowledge base should be updated whenever TEKU publishes new official information.

If the chatbot is uncertain whether information is current, it should say so rather than presenting potentially outdated information as fact.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 38: CHATBOT IMPLEMENTATION CARD

Topic: 38. Handling Outdated Information

Operational rules

- Answer directly when the knowledge base contains reliable information.
- If the question is ambiguous, ask one short clarifying question.
- Do not invent missing facts.
- Prefer current official TEKU sources over old or unofficial material.
- Keep simple answers concise and provide more detail only when needed.

Suggested user-question patterns

- What information do you have about 38. handling outdated information?
- Can you explain 38. handling outdated information at TEKU?
- Where can I get official information about 38. handling outdated information?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	38. Handling Outdated Information
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 39: 39. Privacy and Security

SOURCE KNOWLEDGE

The chatbot should protect student and applicant privacy. It should never request passwords, PINs, one-time passwords, bank card numbers, or other confidential credentials.

If the chatbot is connected to a university database, access to personal information should require appropriate authentication and authorization. The chatbot should only provide personal academic information to the authenticated person who is authorized to access it.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 39: CHATBOT IMPLEMENTATION CARD

Topic: 39. Privacy and Security

Operational rules

- Protect personal and authentication information.
- Never request passwords, PINs or one-time passwords.
- Direct users to authenticated official systems for private records.
- Do not expose another student's information.
- Escalate account-specific issues to authorized support.

Suggested user-question patterns

- What information do you have about 39. privacy and security?
- Can you explain 39. privacy and security at TEKU?
- Where can I get official information about 39. privacy and security?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	39. Privacy and Security
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 40: 40. Escalation to Human Staff

SOURCE KNOWLEDGE

Some questions require university staff rather than an automated chatbot. These include disputes over examination results, disciplinary cases, admission appeals, payment disputes, confidential student records, complex registration problems, official complaints, and technical problems that cannot be resolved through standard instructions.

When escalation is necessary, the chatbot should explain why human assistance is required and provide the relevant university office or official contact method when that information is available.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 40: CHATBOT IMPLEMENTATION CARD

Topic: 40. Escalation to Human Staff

Operational rules

- Answer directly when the knowledge base contains reliable information.
- If the question is ambiguous, ask one short clarifying question.
- Do not invent missing facts.
- Prefer current official TEKU sources over old or unofficial material.
- Keep simple answers concise and provide more detail only when needed.

Suggested user-question patterns

- What information do you have about 40. escalation to human staff?
- Can you explain 40. escalation to human staff at TEKU?
- Where can I get official information about 40. escalation to human staff?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	40. Escalation to Human Staff
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 41: 41. Recommended Chatbot Response Style

SOURCE KNOWLEDGE

The chatbot should respond in a friendly and professional manner.

A typical response should begin with a direct answer, followed by a short explanation and, when appropriate, the next step the user should take.

For example, if a student asks about admission requirements, the chatbot should identify the program and level, explain the applicable requirements, and then tell the student how to proceed with the application.

The chatbot should avoid unnecessarily long answers to simple questions. However, when a student asks for detailed guidance, the chatbot should provide the information in an organized manner using headings, numbered steps, or short paragraphs.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 41: CHATBOT IMPLEMENTATION CARD

Topic: 41. Recommended Chatbot Response Style

Operational rules

- Answer directly when the knowledge base contains reliable information.
- If the question is ambiguous, ask one short clarifying question.
- Do not invent missing facts.
- Prefer current official TEKU sources over old or unofficial material.
- Keep simple answers concise and provide more detail only when needed.

Suggested user-question patterns

- What information do you have about 41. recommended chatbot response style?
- Can you explain 41. recommended chatbot response style at TEKU?
- Where can I get official information about 41. recommended chatbot response style?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	41. Recommended Chatbot Response Style
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 42: 42. Knowledge Priority

SOURCE KNOWLEDGE

When multiple sources contain different information, the chatbot should prioritize the most recent official information published by Teofilo Kisanji University. Official university publications, prospectuses, admission notices, academic calendars, fee structures, regulations, and official announcements should take priority over unofficial websites, social-media comments, student rumours, or old documents.

The chatbot should clearly communicate uncertainty when official information is unavailable.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 42: CHATBOT IMPLEMENTATION CARD

Topic: 42. Knowledge Priority

Operational rules

- Protect personal and authentication information.
- Never request passwords, PINs or one-time passwords.
- Direct users to authenticated official systems for private records.
- Do not expose another student's information.
- Escalate account-specific issues to authorized support.

Suggested user-question patterns

- What information do you have about 42. knowledge priority?
- Can you explain 42. knowledge priority at TEKU?
- Where can I get official information about 42. knowledge priority?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	42. Knowledge Priority
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 43: 43. General Contact Guidance

SOURCE KNOWLEDGE

For matters that cannot be answered using the chatbot's knowledge base, users should be directed to the appropriate official TEKU office. Depending on the issue, this may include admissions, registry, finance, academic departments, student affairs, library services, information technology support, or university administration.

The chatbot should provide contact details only when they have been verified as current. It should not invent telephone numbers, email addresses, physical addresses, payment details, or names of university officials.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 43: CHATBOT IMPLEMENTATION CARD

Topic: 43. General Contact Guidance

Operational rules

- Answer directly when the knowledge base contains reliable information.
- If the question is ambiguous, ask one short clarifying question.
- Do not invent missing facts.
- Prefer current official TEKU sources over old or unofficial material.
- Keep simple answers concise and provide more detail only when needed.

Suggested user-question patterns

- What information do you have about 43. general contact guidance?
- Can you explain 43. general contact guidance at TEKU?
- Where can I get official information about 43. general contact guidance?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	43. General Contact Guidance
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 44: 44. Final Purpose of the Chatbot

SOURCE KNOWLEDGE

The purpose of the TEKU chatbot is to make university information easier to access. It should help prospective students understand available programs and admission procedures, help current students find information about university services and academic procedures, and help visitors and members of the public obtain general information about the institution.

The chatbot is an information and assistance system and should not replace official university decision-making. Where an issue requires an official decision, verification of personal information, payment confirmation, disciplinary judgment, academic judgment, or other administrative action, the chatbot should direct the user to the appropriate authorized TEKU office.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 44: CHATBOT IMPLEMENTATION CARD

Topic: 44. Final Purpose of the Chatbot

Operational rules

- Answer directly when the knowledge base contains reliable information.
- If the question is ambiguous, ask one short clarifying question.
- Do not invent missing facts.
- Prefer current official TEKU sources over old or unofficial material.
- Keep simple answers concise and provide more detail only when needed.

Suggested user-question patterns

- What information do you have about 44. final purpose of the chatbot?
- Can you explain 44. final purpose of the chatbot at TEKU?
- Where can I get official information about 44. final purpose of the chatbot?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	44. Final Purpose of the Chatbot
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CHAPTER 45: 45. Summary

SOURCE KNOWLEDGE

Teofilo Kisanji University is a higher-learning institution located in Mbeya, Tanzania, with a background associated with the Moravian Church in Tanzania. The university provides higher education and supports teaching, research, innovation, professional development, and community service.

A TEKU chatbot should provide accurate, clear, respectful, and useful information to applicants, students, staff, parents, visitors, and members of the public. It should answer common questions about the university while recognizing that information such as programs, fees, admission requirements, deadlines, contacts, and academic calendars can change. The chatbot should therefore rely on the latest verified university information and should refer users to official university offices whenever a question requires authoritative confirmation or human intervention.

Source note: This chapter is derived from the user's supplied TEKU chatbot knowledge documentation. Where the document itself warns that a fact is time-sensitive, the chatbot should verify it against the latest official TEKU publication.

CHAPTER 45: CHATBOT IMPLEMENTATION CARD

Topic: 45. Summary

Operational rules

- Answer directly when the knowledge base contains reliable information.
- If the question is ambiguous, ask one short clarifying question.
- Do not invent missing facts.
- Prefer current official TEKU sources over old or unofficial material.
- Keep simple answers concise and provide more detail only when needed.

Suggested user-question patterns

- What information do you have about 45. summary?
- Can you explain 45. summary at TEKU?
- Where can I get official information about 45. summary?

Fallback behaviour

If the knowledge base does not contain a reliable answer, the assistant should say so clearly, avoid guessing, and direct the user to the appropriate verified TEKU office or official source when available.

RAG metadata to attach

Field	Example
topic	45. Summary
academic_year	current / source year
source_type	official / user-supplied
source_priority	high / highest
last_verified	YYYY-MM-DD
confidence	high / medium / low

CURRENT OFFICIAL WEB UPDATE 1: Current official download centre

TEKU's official download centre currently lists 2026/2027 admission and joining instructions for certificate programmes, continuing diploma students, all bachelor degree admissions, BSc Computer Science, BSc with Education, BSc Environmental Science, BHRM, BA Economics, BA with Education, BA Social Work, BA Community Development, Bachelor of Divinity, Diploma in Theology, and health certificate programmes.

Chatbot handling: Store this item with its source URL, academic year/date, and verification date. Do not merge it silently with older documents when values differ.

Official reference: <https://www.teku.ac.tz/downloadcentre.php> and related official TEKU pages.

CURRENT OFFICIAL WEB UPDATE 2: 2026/2027 undergraduate admission snapshot

The official undergraduate admission-letter template states that the 2026/2027 degree programme is full-time and three years, with reporting/registration scheduled for 19 October 2026, orientation 26–30 October 2026, and classes commencing 2 November 2026. Registration requires original academic certificates, passport photographs, birth certificate or NIDA, sponsor confirmation where applicable, medical form, and proof of first-installment payment.

Chatbot handling: Store this item with its source URL, academic year/date, and verification date. Do not merge it silently with older documents when values differ.

Official reference: <https://www.teku.ac.tz/downloadcentre.php> and related official TEKU pages.

CURRENT OFFICIAL WEB UPDATE 3: 2026/2027 academic calendar snapshot

The official 2025/2026 Almanac published by TEKU also includes forward dates into the 2026/2027 academic year: reporting and registration for new students is scheduled for 19–23 October 2026, orientation for first-year students for 21–23 October, continuing-student registration for 26–27 October, and classes begin 28 October 2026 in that Almanac. This conflicts with the separate undergraduate admission-letter template, which says classes begin 2 November 2026. The chatbot must therefore preserve the source/date and ask users to rely on the latest programme-specific joining instruction.

Chatbot handling: Store this item with its source URL, academic year/date, and verification date. Do not merge it silently with older documents when values differ.

Official reference: <https://www.teku.ac.tz/downloadcentre.php> and related official TEKU pages.

CURRENT OFFICIAL WEB UPDATE 4: Current programme/fee snapshot

TEKU's current fee-structure page lists annual fees for certificate, diploma, bachelor and postgraduate programmes. Examples include BSc Computer Science at TZS 1,500,000, BSc with Education at TZS 1,500,000, BA with Education at TZS 1,200,000, Bachelor of Divinity at TZS 600,000, PGDE at TZS 2,200,000, Master of Theology at TZS 3,200,000 and PhD in Theology at TZS 7,500,000. Programme-specific joining instructions may contain additional charges and instalment schedules, so the chatbot should not treat a simple annual tuition figure as the complete cost.

Chatbot handling: Store this item with its source URL, academic year/date, and verification date. Do not merge it silently with older documents when values differ.

Official reference: <https://www.teku.ac.tz/downloadcentre.php> and related official TEKU pages.

CURRENT OFFICIAL WEB UPDATE 5: Source conflict policy

The website currently contains information from different academic years and pages that do not always agree. The chatbot knowledge base should therefore store academic year, source URL/document, publication/update date when available, programme, and source priority. Newer official programme-specific joining instructions should normally outrank older general fee pages, while conflicting current official documents should be presented as a discrepancy rather than silently reconciled.

Chatbot handling: Store this item with its source URL, academic year/date, and verification date. Do not merge it silently with older documents when values differ.

Official reference: <https://www.teku.ac.tz/downloadcentre.php> and related official TEKU pages.

APPENDIX A — RAG DOCUMENT METADATA SCHEMA

- Every document chunk should carry: document_id, title, section, programme, academic_year, source_url, source_type, publication_date, last_verified, priority, language, and chunk_id.
- Time-sensitive facts should additionally carry effective_from and effective_to where known.
- Fees should be represented as structured records rather than only free text: programme, level, academic_year, fee_item, amount_tzs, payment_period, source_document and verification_date.
- Admission requirements should be linked to programme and level so that the chatbot does not apply one programme's requirements to another.

APPENDIX B — ANSWER GENERATION POLICY

- Answer from retrieved TEKU evidence first. Gemini should be the language generator, not the authority on TEKU facts.
- When evidence is missing, say that the information is not available in the current knowledge base.
- For fees, deadlines, programme availability, admission requirements and contact details, prefer current official sources.
- When two official current sources disagree, state the discrepancy and recommend the latest programme-specific instruction or direct verification with the responsible office.
- Never expose private student records or ask for passwords, PINs, OTPs or confidential credentials.

APPENDIX C — FAQ COVERAGE PLAN

- Identity: What is TEKU? Where is it located? Who owns it? What is its history?
- Admissions: How do I apply? What are requirements? What documents do I bring? When is registration?
- Programmes: Does TEKU offer Computer Science? Which faculties exist? What postgraduate programmes are available?
- Fees: How much is tuition? What other charges apply? Can I pay in instalments? How do I obtain a control number?
- Student services: library, accommodation, IT systems, academic advising, student organizations, examination and results procedures.
- Safety and privacy: what the chatbot can answer, what must be escalated, and what confidential information must never be requested.

APPENDIX D — DEPLOYMENT PREPARATION

- Development stack: Python, Jupyter Notebook, Gemini API, retrieval layer, Streamlit UI and GitHub.
- Secrets: keep GEMINI_API_KEY outside source control; use local environment variables during development and deployment secrets in the hosting platform.
- Recommended repository structure: app.py, notebooks/, src/, data/raw/, data/processed/, assets/, requirements.txt and .gitignore.
- Before deployment, run a test set covering admission, fees, programme availability, contacts, academic calendar, privacy and escalation.

APPENDIX E — VERSIONING STRATEGY

- Create a new knowledge snapshot whenever TEKU publishes a new prospectus, fee structure, joining instruction or academic calendar.
- Do not overwrite old documents without preserving their academic year. Historical documents can still be useful when a user asks about a previous cohort.
- Use a source-priority rule and explicit last-verified date so the assistant can explain why it chose one source over another.
